## DETAILED ACTION

This office action is in response to applicant's response mailed 2/2/04.

Claims 1-11, 13-20, 22-29 are pending in the case.

### *Claim Objections*

Claims 8 and 11 objected to because of the following informalities: the claims have a blank space where presumably the greek symbol "beta" should be (i.e. "beta-gal"). Appropriate correction is required.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11, 13-20, 22-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This is a new rejection.

The claims are vague and indefinite in the recitation of "RNA-activated protein kinase (PKR)" since it cannot be determined what the metes and bounds of the intended subject matter is. The specification defines PKR as "the host cell protein kinase which is activated by interferon, also known as p68 kinase, P1, DAI dsl or eIF-1 kinase, and any derivative of PKR thereof , or fragments or peptides having the amino

acid sequence corresponding to PKR" ( page 7 of the specification). Therefore it appears that the term RNA-activated protein kinase (PKR) can be virtually any molecule, including any fragments (even single amino acids) or any "derivative". It does not appear that applicants intend to encompass single amino acids, but it is unclear how much larger than single amino acids the "fragments" must be in order to be encompassed by the term. Therefore, the claims fail to set forth clearly the intended subject matter.
